PROFESSIONAL SUMMARY

Entry-level Data Analyst with a Computer Science degree (B.E., CGPA 8.4, 2026). Skilled in SQL, Python (Pandas, NumPy), Power BI and Advanced Excel for data cleaning, exploratory analysis, KPI reporting and dashboards. Built end-to-end analytics projects on real Indian datasets. Strong engineering foundation with growing focus on ETL, data modeling and Snowflake.

TECHNICAL SKILLS

- SQL & Databases: SQL, MySQL, Joins, Subqueries, CTEs, Window Functions, GROUP BY, HAVING, Aggregations.
- Advanced Excel: Microsoft Excel, Pivot Tables, XLOOKUP, INDEX MATCH, Power Query, Data Validation.
- BI & Visualization: Power BI, DAX, Power Query, Dashboards, Drill-Down Reports, Data Visualization, KPI Reporting.
- Programming: Python, Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA).
- Analytics: Data Analysis, Data Cleaning, Reporting, Business Insights, Dashboard Development.
- Data Engineering Basics: ETL (Extract, Transform, Load), REST APIs, Git, GitHub.
- Currently Learning: Statistics, Machine Learning (Classification, Regression), Snowflake.

PROJECTS

E-commerce Sales Performance & Customer Analytics | MySQL, Advanced Excel, Power BI (DAX), Statistics | AUG 2026

• Analyzing 100K+ orders across customers, sellers, products, payments and reviews using SQL (multi-table joins, CTEs, window functions) to measure revenue, AOV, growth and repeat-purchase rate.

• Building a multi-page Power BI dashboard (KPI cards, YoY/MoM trends, drill-through) with RFM segmentation, Pareto analysis and delivery-vs-review impact, plus business recommendations.

UPI Digital Payments Analytics Pipeline | Python (Pandas, Requests), Snowflake, SQL, GitHub Actions, Power BI | SEP 2026

• Building an ETL pipeline to load NPCI monthly UPI transaction data into Snowflake with RAW, STAGING and MART (star schema) layers.

• Writing SQL transformations (CTEs, window functions) and data-quality checks, with scheduled refresh via GitHub Actions and a Power BI dashboard on volume, value and growth trends.

AI-Narrated Sales Dashboard | Python, SQL, Power BI, Advanced Excel, Gemini API, Streamlit | In Progress

• Building an interactive sales dashboard (KPIs, trends, segment drill-downs) with an AI panel that writes plain-English insights from the filtered data.

• Verifying every number in the AI summary against computed values before display.

EDUCATION

B.E. in Computer Science Engineering | JNN College of Engineering , Shivamoggga |CGPA 8.4/10| 2026
Pre-University Education (PCMB) | MDR PU Science College, Savanur Karnataka | 91.6% | 2022
Secondary School Education (SSLC) | MDMR School, Chikkerur, Karnataka | 92.8% | 2020

CERTIFICATIONS

- SQL (Basic & Intermediate) | HackerRank
- Microsoft Power BI Data Analyst 101 |
- Machine Learning with Python | Simplilearn SkillUp
- Advanced MS- Excel | Coursera
- Generative AI Fundamentals | Google AI Skills
